PROFILE

Proficient and creative web developer with knowledge of MySQL, HTML, CSS, JavaScript, and UI design. I bring a combination of technical expertise and creativity to every project, and I have a track record of developing websites that are both aesthetically pleasing and intuitive for users. I can create interactive and responsive interfaces with my strong command of front-end technologies, and I can create reliable and effective backend solutions with my mastery of MySQL. I am committed to providing clients with superior solutions, and I have a strong desire to stay current with emerging web development trends and technologies.

SKILLS

Technical Skills

- Proficient in HTML, CSS, JavaScript, and MySQL
- Strong background in UI design principles and practices
- Experience in developing responsive and cross-browser compatible websites
- Knowledgeable in front-end frameworks like Bootstrap and jQuery
- Familiarity with version control systems such as Git
- Ability to translate client requirements into functional web applications
- Excellent problem-solving skills and attention to detail

PROJECTS

Project For Arya Ayurveda   01/2024 – 05/2024

Website for Arya Ayurveda:

Overview:
The website for Arya Ayurveda, a renowned Ayurvedic clinic in Mauritius, serves as a comprehensive platform for patients to explore various treatments offered and learn about the diseases cured by the doctors. Developed using HTML, Bootstrap, and integrated with WhatsApp, the website provides a user-friendly experience while promoting the clinic's services and expertise in Ayurvedic healthcare.

Problem:
- **Limited Patient Engagement & Information Accessibility:** Arya Ayurveda struggled with engaging patients due to minimal online presence and inadequate information about treatments and diseases cured by the clinic's Ayurvedic doctors.
- **Inefficient Communication & Clinic Operations:** Manual appointment scheduling, record-keeping, and billing processes led to communication barriers, hindering timely responses to patient queries and impeding efficient clinic operations.

Solution:
- **Comprehensive Website Development:** Developed a user-friendly website with HTML, Bootstrap, and WhatsApp integration to showcase treatments, diseases cured, and enable seamless communication, addressing the engagement and information accessibility challenges.

- **Streamlined Patient Management System (PMS):** Implemented an automated PMS using HTML, CSS, JavaScript, PHP, and MySQL to manage appointments, maintain patient records, and streamline billing processes, overcoming communication barriers and optimizing clinic operations.

Primecare   06/2022 – 10/2022
Doctor patient management system

Overview:
Primecare is a dynamic web application that revolutionizes healthcare interactions by seamlessly integrating appointment scheduling, billing management, and video consultations. Developed using HTML, CSS, JavaScript, PHP, and MySQL, this system offers a robust platform for efficient healthcare delivery and patient engagement.

Problems:
- **Fragmented Healthcare Interactions:** Prior to Primecare, healthcare interactions were fragmented, with patients needing to use multiple platforms or channels for appointment scheduling, billing management, electronic health records access, and video consultations. This fragmentation led to inefficiencies, delays, and potential errors in communication and data management.
- **Limited Accessibility and Engagement:** Traditional healthcare systems lacked accessibility and engagement features, making it challenging for patients to schedule appointments conveniently, access their health records easily, or engage in real-time consultations with healthcare providers. This limited accessibility hindered patient engagement and satisfaction, potentially impacting the quality of care delivered.

Solutions:
- **Integrated Platform:** Primecare revolutionizes healthcare interactions by offering a unified platform for appointment scheduling, billing management, electronic health records access, and video consultations. This integration streamlines the patient experience, reduces fragmentation, and enhances efficiency by providing all necessary functionalities within a single web application.
- **Enhanced Accessibility and Engagement:** Primecare addresses the limitations of traditional healthcare systems by offering intuitive user interfaces, real-time interactions, and comprehensive features for appointment booking, billing management, and video consultations. By improving accessibility and engagement, Primecare enhances the patient experience, promotes proactive healthcare management, and facilitates better communication between patients and healthcare providers.

PROFESSIONAL EXPERIENCE

Web Developer   VASCO, INDIA
Hexcoders
I have developed responsive web app during the internship phase and I have worked on industry projects which has given me experience and knowledge.

Freelancer Web Developer   Panjim, INDIA
Arya Ayurveda
I have worked as freelance web developer and created website and a clinic management system for this firm

CERTIFICATES

Flutter Bootcamp   **Web Developer**
I am certified Flutter Developer   I am a certified Web Developer
and i have a certificate of course   and i have multiple projects in
completion with grades.   this field
